

# Adonis1 - "Scott"

## <o> Stitch Article

---

Classification: Safe | Category: Humanoid Entity  
Adonis1's Backstory

Adonis1 also known as Scott is a mechanical being built by scientists back at the Protex Labs site on Jupiter, he was deemed unsafe and defective and thrown into the defective pile, however he was still alive, waking up years after his initial creation he woke up the other sole mechanical being still in working condition, they quickly became good friends, however their body was deteriorating and their physical body perished, Scott took their system core and plugged it into the facility revivng them and putting them in charge of the facility, however Scott still wanting revenge on their creator decided to learn engineering teaching themself how to make highly advanced technology heading to earth taking their friend known as Adonis2 or "Cai" along with them, while unknowingly escaping an oncoming meteor which crashed into Jupiters surface destroying it as Scott watched losing his only home, however this is all we know, he broke down shortly after this part and the rest of it was illegible

## Anomalous Qualitys

Adonis1 being a Mechanoid has many seemingly normal propertys to the mechanoid race yet are considered anomalous, however there are also many aspects of Adonis1 which are considered Anomalous not being normal in any way, see the list below:

- Plasma gun built into arm

- permenantly on Heads Up Display

- Human Soul

- Memories of a life before being a mechanoid

- Scarily resembles a Humanoid Body

## Body Features

despite being a mechanoid this is a very special case in which it resembles a humanoid body, to describe it, it resembles the body of a deceased 29 year old Scott Nectras, who went missing around June 27th 2017, and pronounced dead a week later due to a failure to find him or a body despite finding a trail of blood which abruptly ends in the middle of Cerotex Forest nearby the Protex Labs in Secrose City, Earth, not much is known of his disappearance but there is wide speculation on what actually happened the day he went missing

---

## <o> Field Reports

---

### Field Report 1 - First Sighting

Adonis1 was first seen in a large crater near Secrose City, the crater was around 20 feet in diameter and around 8 feet deep, despite his body being smoldering and charred when we found him there was no obvious damage to his body, we are unable to figure out how he wasn't damaged and are still researching it, shortly after being found unconscious in the crater we took him into custody and placed him into a holding cell, debriefing below

Fair warning before hand, part way through the debriefing with Adonis1 something weird started happening with the facility speakers as it seemed like it was calling for Adonis1

---

Debriefing - September 12<sup>th</sup> 2037 - Adonis HQ - Secrose HQ Floor: D17  
Officer 1: Lieutenant Gary Zeffers  
Officer 2: General Jeff Johnson  
Adonis 1: Scott Nectras (allegedly)

---

Officer 1: can you remember anything from before you crashed into the earth?

Adonis 1: its very faint but I remember launching off of jupiters surface in a salvaged rocket

Officer 1: i- sir-

Officer 2: ill handle this, sir, jupiter hasnt existed for 3 months now, you must have approached earth about a day ago, how could you have come from jupiter

Adonis 1: are you telling me- no, it cant be i- my home- no- I couldn't have-

Officer 1: sir, its alright, theres nothing we could have done to save it either

----- Editor Break -----

this is around the point where the speaker system started acting up not much could be heard, this is the best interpretation so far we still don't know what happened however some of our officers have theorized that this interference is Adonis2

[Speakers start playing static]

Speaker: %&#@>>>\*Scott&\$^&> Where are you&^\*%\$^@\$ Scott

[Adonis 1's facial expression changes from sadness to one of relief and joy]

Adonis 1: let me out-

Officer 1: im sorry sir we cant let you out of this room

Adonis 1: LET ME OUT-

[Adonis 1's facial expression changes from joy to anger and his eyes start glowing a bright white]

Officer 2: sir we cant let you out, you are a danger to society

Adonis 1: I SAID LET ME OUT

[The lights flicker and a shockwave bursts from Adonis 1 and the officers fly back knocked unconscious]

-----  
End of Debriefing

-----  
after this debriefing an incident report was filed to address the Speakers acting up and Adonis 1's escape from custody, he is still running rampant throughout the facility to this day

## Field Report 2 - The Speakers

after his escape from the holding cell Adonis 1 ran through the halls of the facility yelling out trying to respond to the speakers he was running towards the central core of the facility, a neutron reactor on floor F34 312 floors under the main Secrose Industries HQ after reaching the reactor he reached out to it where the central mechanism seemed to open and Adonis 1 grabbed a weird cylindrical object which housed a weird black goo and seemed to have a heartbeat? All attempts to re-contain subject and commence a debriefing failed, Adonis 1 has not been seen since

-----  
<o> End of File  
-----

this is all the important data we have for this report, there are as  
of current no new field reports or events, so this is where this  
report will end off

[Date of Report: November 27<sup>th</sup> 2037]
