[Cai] Incident Reports -----

Try and contain us here will you? Guess ill leak incident
reports relating to me and scott.

Also i may be leaking adonis emails but i cant leak their email
domain, some sort of hard coded security wont let me

Incident Report 1: Escape

From: 76-4f-90-12@[REDACTED].teras
To: 12-64-ff-04@[REDACTED].teras
Subject: Adonis1 Incident Report 9-12-2037
=====

Today during the debriefing of the recently captured Adonis1 we suffered a potentially catastrophic incident, near the beginning of the debriefing the facility speaker system started acting up, first it started with static, and then a heavily distorted voice we couldnt quite make out, except for what we believe was "Scott, Where are you scott?" as soon as this played throughout the facility Adonis1 seemed relieved and then started demanding we let him out, once we declined his demands he scream out "LET ME OUT" and a shockwave seemed to throw me and Lieutenant Gary Zeffers into the wall, we were unable to see anything that happened afterwards but after we woke up the room was a mess and the door was blown open, Adonis1 was nowhere to be seen and the speakers were talking again, seemingly directing Adonis1 to the central facility core, neither me or gary have seen Adonis1 since

Incident Report 2: The Flee

<< >> = comment (not included in sent email)

From: 44-2b-6c-12@[REDACTED].teras
To: 12-64-ff-04@[REDACTED].teras
Subject: Adonis1 Security Report 9-12-2037
=====

Around 5 minutes ago me and 5 other guards watched as an escaped Adonis 1 ran through the halls screaming "WHERE ARE YOU" and "SPEAK TO ME PLEASE" towards the speakers which at the time were acting up, they seemed to speak back a minute later, we were able to interpret the sentence "go to floor F34, im in the core", we are unable to identify what is speaking through the speakers but we believe it may be Adonis 2 <<took you long

enough to figure it out>> i was unable to see anything else but some people at the core reported seeing Adonis 1 reach out to the core and watched it open before he grabbed a weird cylindrical item from its center before Adonis 1 fled the scene running up 312 floors and exiting the facility, no one has seen him since
